Quarterly Release Notes

**Q4 2021**

# Release Notes for Quarter 4, 2021

The Teladoc Health Product Management team remains committed to providing continued improvements and enhancements for our solutions and services to support the growth of your telehealth programs. These release notes include the details of all release content delivered during our Q4 release.

The Teladoc Health Solo™ Platform releases do not align to a calendar quarter. The Q4 engineering development continued through the second week of January.

Below are highlights of recent and planned product releases and a brief highlight of new features and updates to the Solo™ Platform.

## Q4 2021 Solo Platform Releases

### Web App

**Web Provider and Patient Apps:** The Teladoc Health Web Provider and Patient App releases occur every two weeks. The primary focus for this quarter was to add Blur background for Chrome users. The last bi-weekly update will occur January 14, 2022 in client test environments and January 18 in production. All enhancements behind a release toggle are enabled in client test environments biweekly and will be enabled in all production environments February 22, 2022.

### Mobile App

**iOS Provider and Patient Apps:** Teladoc Health iOS Provider and Patient Apps will be pushed to all clients starting the week of January 31, 2022 with a new Fit to frame and Fill frame video enhancement.

### Smart Notes Module

The Teladoc Health Smart Notes Module releases occur every two weeks. The primary focus for this quarter was to improve user navigation and to make the platform more responsive for mobile devices. The last bi-weekly update will occur January 14, 2022 in client test environments and January 18 in production. All enhancements behind a

release toggle are enabled in client test environments biweekly and will be enabled in all production environments February 22, 2022.

## **Analytics Module**

A new release of the Teladoc Health Analytics development added new fields to the Performance Report - Care Location Data. This data will be available to clients in the February 5, 2022 monthly report.

## **Connected Devices**

The new release of Windows devices software, iOS Provider Access, and iOS Viewpoint rolled out the week of December 13, 2021. Improvements include:

**Windows Device Software (includes Win Viewpoint Software):** The new release of the Win Device software includes support for the Epiphan's SDI converters and EKO Stethoscope persistent pairing.

**iOS Viewpoint Software:** The new release of the iOS Viewpoint info menu includes an improved navigation experience.

**iOS Provider Access Software:** The new release of the iOS Provider Access software presents users with a series of requesting permission screens, such as camera and microphone access, which are required to conduct a virtual encounter.

## **Browser Support**

As part of our Quarterly release, Teladoc Health revises the list of supported browsers and versions. For the Q4 release, there will be no changes or updates to the list of supported browsers and versions. The current list is found under **Browser/OS Compatibility and Tested Devices**.

**Patient:** <https://intouchhealth.com/support/patient-resources/>

**Provider:** <https://intouchhealth.com/support/admin-provider-resources/>

Browser	Current Support	Support Starting January 18, 2022	Operating System
Chrome	86	86	Chrome 86 Mac OS 10.14 and later, Windows 7 and 10, and Android v7.0 and later
Safari	14	14	Max OS 10.14 and later, and iOS 12.1 and later
Firefox	78	78	Windows 7 and 10
Edge	88	88	Windows 10

# Solo™ Platform

## Platform Enhancement

**Browser Support:** IDA/Electron, Chrome, Safari-MAC, Firefox, and Edge.

**Collapse and Expand:** The **Collapse/Expand** button for the right and left panel now appears only when users hover over the button, which allows for better access of the scroll bar on desktop devices.

Key	Component	Version	Operating System
RVN-1074	Platform Enhancement	10.2	MacOS, and Windows - 32bit and 64bit.
<b>Release Toggle:</b> None			

**Encounter Dashboard:** Solo users can now configure the encounter dashboard to reset the filters after logging into a practice to view the full list of encounters. Configuration can be found under **Encounters** sections in **Practice Settings**.

Key	Component	Version	Operating System
RVN-1055	Platform Enhancement	12.1	MacOS, and Windows - 32bit and 64bit.
<b>Release Toggle:</b> LocalEncounterFilters			

**Login:** The number of failed attempts allowed before an account is locked has been reduced.

Key	Component	Version	Operating System
CORE-5133	Platform Enhancement	12.1	MacOS, and Windows - 32bit and 64bit.
<b>Release Toggle:</b> LocalEncounterFilters

## Platform Administration

**Browser Support:** IDA/Electron, Chrome, Safari-MAC, Firefox, and Edge.

**Service Settings:** Practice Admins can now establish default service settings that will be applied to all newly created services using a bulk import tool,

Key	Component	Version	Operating System
SCIT-1270	Platform Administration	1.1	MacOS, and Windows - 32-bit and 64-bit.
<b>Release Toggle:</b> Default_Service_Settings			

# Provider App

## Web Provider App

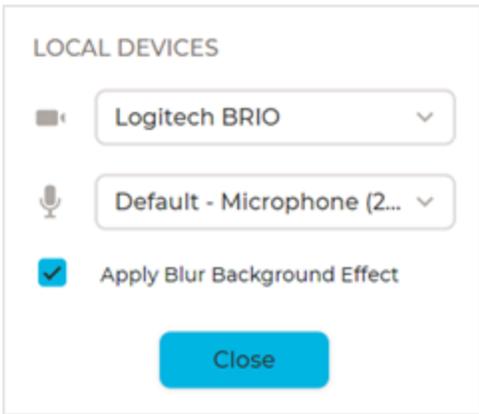

The Web Provider App is a browser-based App used primarily for scheduled and on-demand low and medium acuity care.

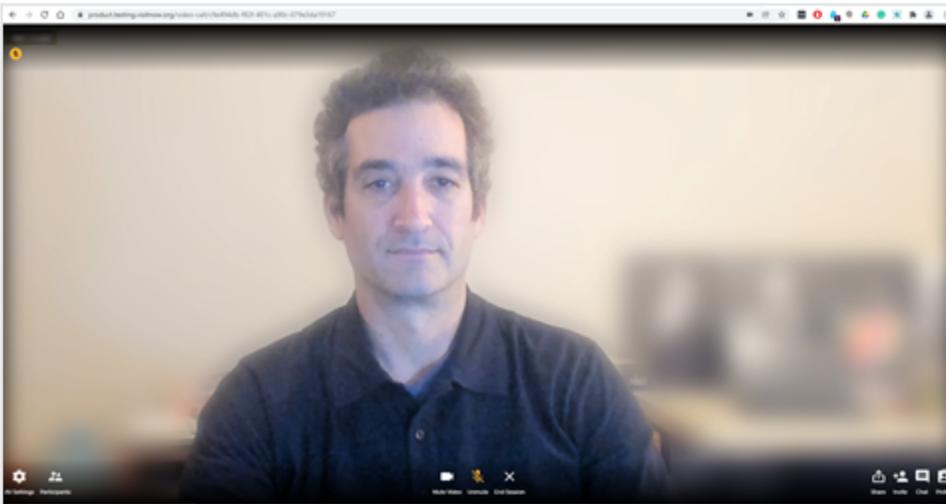

**Browser Support:** Available on Chrome, Safari, and Firefox.

**Blur Background:** Providers and Patients using Chrome now have the ability to blur their background to conceal their environment for increased privacy during a virtual encounter. This feature is only available for DAS and **Chrome**:

Key	Component	Version	Operating System
WPAS-398	Web Provider App and Web Patient App	11.2	Windows 32 and 64 bit

**Release Toggle:** Blur\_Background

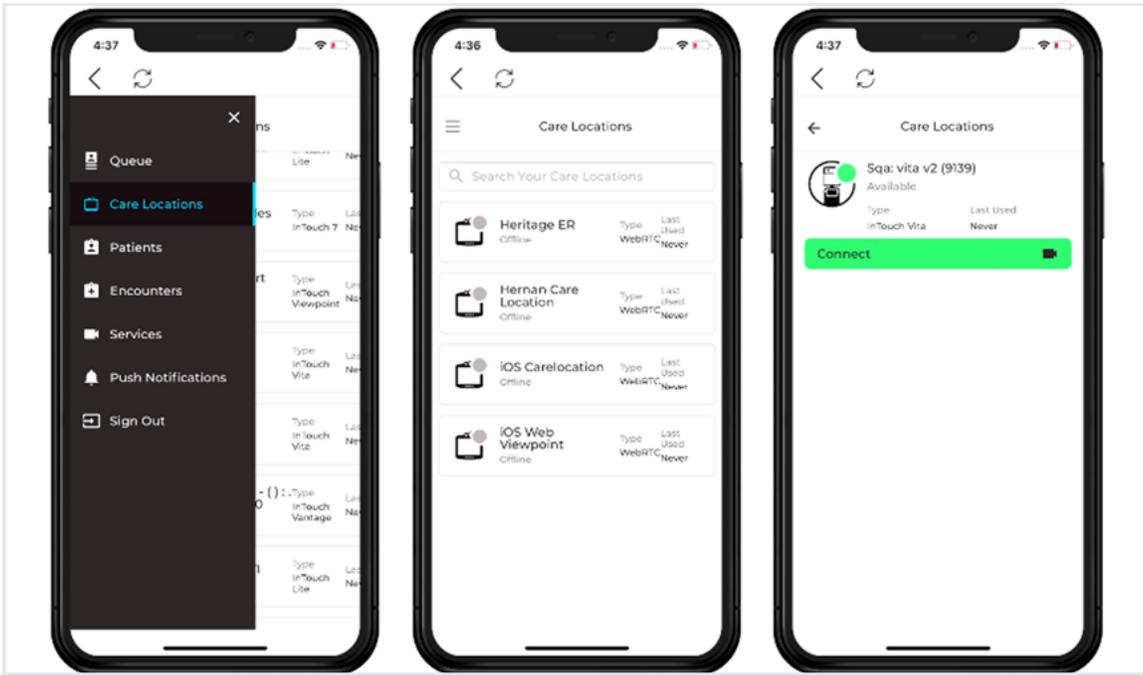

## iOS Provider App

The iOS Provider App provides the same functionality as the browser-based Solo platform on the iPad. On the iPhone, providers can view their queue and conduct virtual encounters. It is available through the Public App Store.

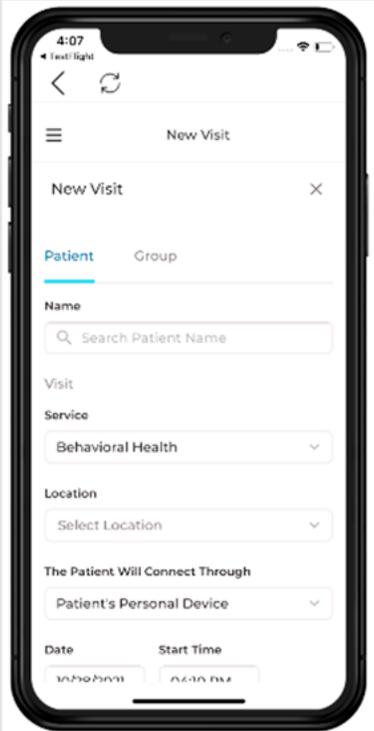

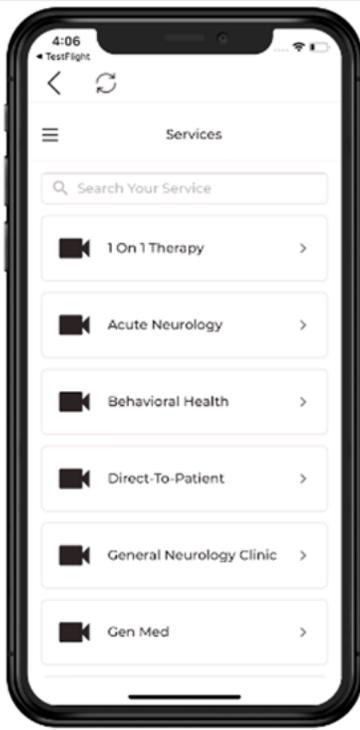

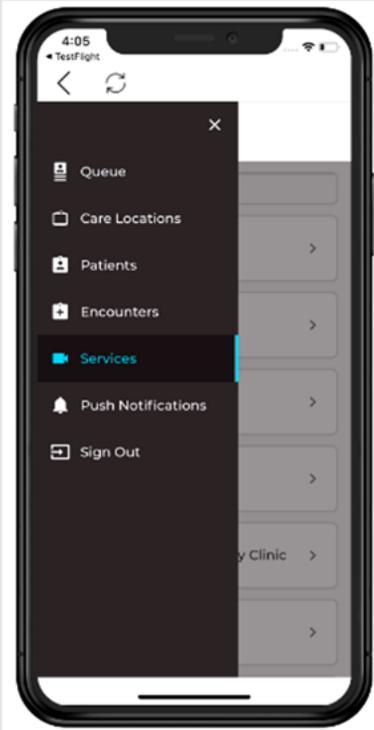

**Care Location dashboard:** The dashboard is now accessible on mobile devices. Users can view a care location list and search for specific ones. A user can also connect to the care location by clicking on the **Connect** button.

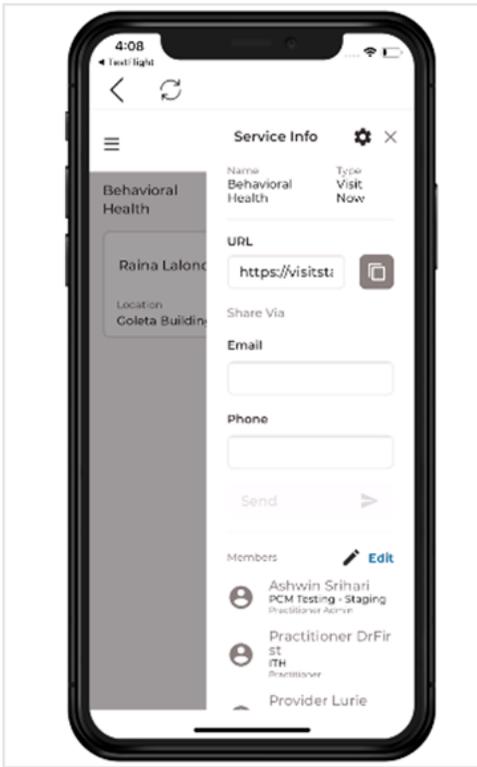

Key	Component	Version	Operating System
ACS-437	Web Provider App and iOS Provider App	10.2	Android and iOS
<b>Release Toggle:</b> CarelocationsMobileNavigation			

**Service tab:** Services are now accessible in the left panel on mobile devices. Users can view the list of services from the **Service** tab and schedule calls with a patient for a specific service. User can also view the **Service Info** page when they click on the top, right corner of the **Service Page**.

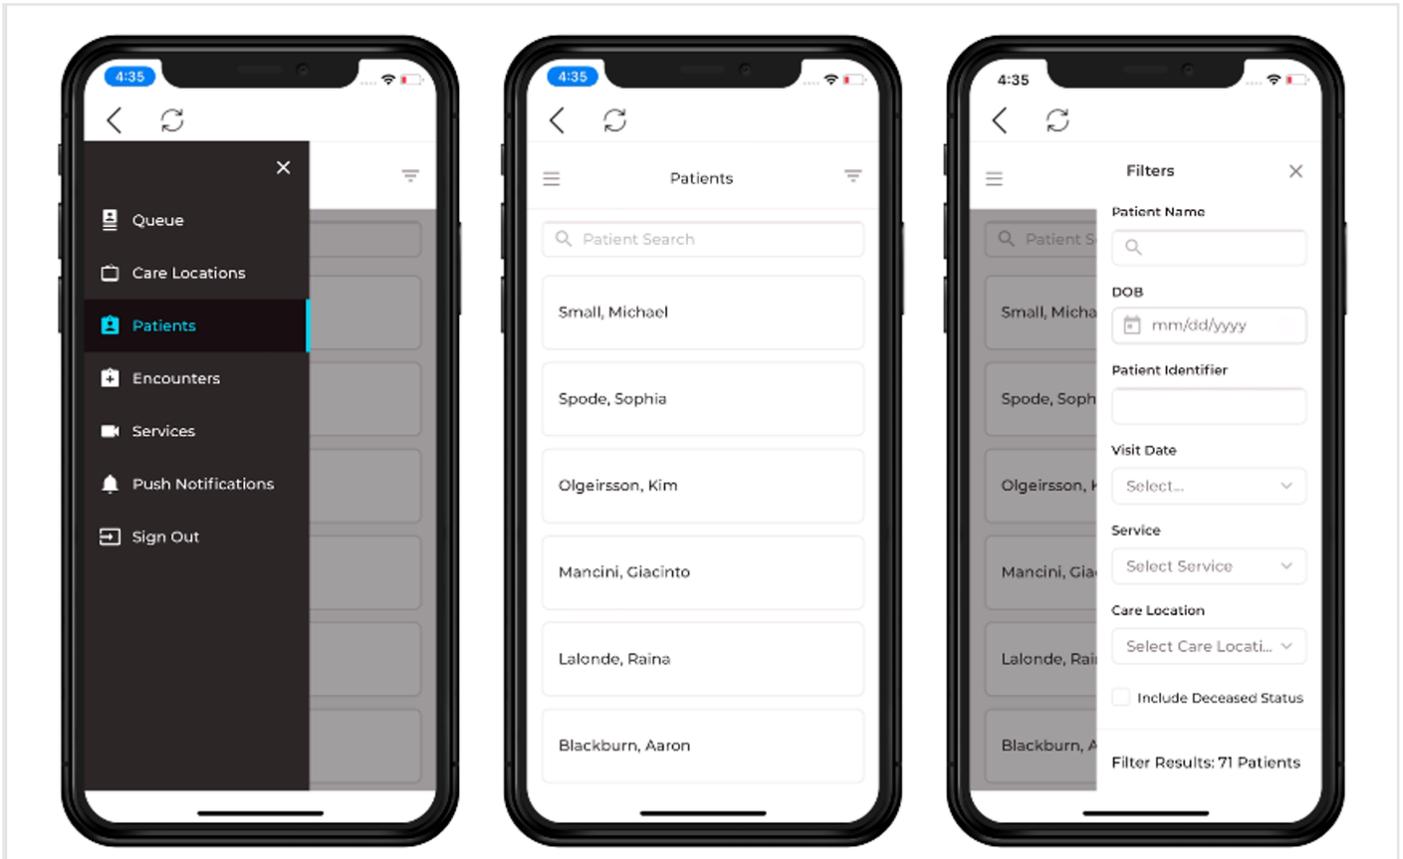

Key	Component	Version	Operating System
ACS-337	Web Provider App and iOS Provider App	10.2	Android and iOS
<b>Release Toggle:</b> ServicesMobileNavigation			

**Patient dashboard:** The patient dashboard is now accessible on mobile devices. Users can view the patient list and patient information in the right Patient panel. Users can search for specific patients or use filters to search groups of patients.

Key	Component	Version	Operating System
ACS-335	Web Provider App and iOS Provider App	10.2	Android and iOS
<b>Release Toggle:</b> PatientsMobileNavigation			

**Mobile Devices:** Solo users on mobile devices can now apply filters through a new touch-optimized filter panel.

Key	Component	Version	Operating System
RVN-933	Platform Enhancement	2021.10.2	Android and iOS

**Configuration Toggle:** EncounterDashboardMobileFilters

**User Interface:** Users can change other participant's video to **Fit to frame**, which crops their video in the view frame or **Fill frame**, which allows users their complete video.

Key	Component	Version	Operating System
IOS-1362	iOS Provider App, Care location App, and iOS Patient App	43.1	iOS
<b>Release Toggle:</b> None			

# Analytics

The Teladoc Health™ Analytics Module helps telehealth administrators see and understand data. Our visual analytics platform transforms the way people use data to solve problems and become a more data-driven telehealth program.

## Performance Report Improvement

**Care Location Data:** The following fields have been added to the Care Location Audit:

**Last Session Time Stamp:** The new field displays after a user's last virtual encounter

**Device Type:** The new field displays the type of device in the current care location (i.e. Vici or Viewpoint)

**Serial Number:** The new field displays the care location's unique serial number

**Branding Logo:** The old InTouch Health Logo has been replaced with the new Teladoc Health Logo

Key	Component	Version	Operating Systems
DT-3898	Performance Report	1.19	Mac OS Windows 32 bit, Windows 64 bit, and Android iOS
<b>Feature Toggle:</b> None			

## Smart Notes

Smart Notes is used to overcome barriers in documenting virtual encounters. Smart Notes users easily select standardized apps built with conditional logic, or unique workflows to meet their clinical documentation needs.

**Browser Support:** IDA/Electron, Chrome, Safari-MAC, Firefox, and Edge.

**Read-Only Access:** Smart Notes forms can be locked after at least one Consult Note has been signed, which allows read-only access to users.

Key	Component	Version	Operating System
SN4-425	Smart Notes	8.2	MacOS, Windows - 32bit and 64bit
<b>Release Toggle:</b> SN4AmendmentAddendum			

**Smart Notes Tables:** Customers with Smart Notes enabled can now configure tables to be expanded by default. This allows users to start a new entry without an extra click.

Key	Component	Version	Operating System
SN4-3696	Smart Notes	12.2	MacOS, Windows - 32bit and 64bit
<b>Release Toggle:</b> None			

**Smart Notes Navigation** Users can leave Smart Notes to access the Teladoc Health Imaging Module, and then return to where they left off.

Key	Component	Version	Operating System
SN4-3699	Smart Notes	12.2	MacOS, Windows - 32bit and 64bit

Key	Component	Version	Operating System
-----	-----------	---------	------------------

**Release Toggle:** None

# Connected Devices

## Patient-Side Devices and Software:

- Innovative telehealth devices provide best-in-class audio and video communications for patients in healthcare environments to receive high-quality healthcare through virtual consults when and where it is needed.
- Standalone Windows/iOS Viewpoint software are available for hospital system IT staff to download and standup telehealth endpoints on owned devices.

**NOTE:** If your device experiences interruptions while upgrading to the latest release, contact the Technical Assistance Center at [tac@teladochealth.com](mailto:tac@teladochealth.com) or 877-484-9119.

## Robot

The robot items relate to all devices.

**Eko Stethoscope persistent pairing:** Once an Eko or Littmann Core stethoscope is connected, it will remain the only default stethoscope.

Key	Component	Version	Operating System
Robot-4078	Windows	Taurus Dot one	Windows
<b>Release Toggle:</b> None			

**Devices including TV Pro family, Lite, Vantage and Viewpoint** now support Epiphan's SDI converters, including Av.io SDI and SDI2USB variants.

Key	Component	Version	Operating System
Robot-3714	Windows	Taurus Dot one	Windows
<b>Release Toggle:</b> None			

**VITA Device's software:** VITA device users have updated usability and clarity.

Key	Component	Version	Operating System
Robot-3210	Windows	Taurus Dot one	Windows
<b>Release Toggle:</b> None			

**Remote Teladoc Device Display:** On a Teladoc Device, remote Practitioner's name is easier to read.

Key	Component	Version	Operating System
Robot-3128	Windows	Taurus Dot one	Windows
<b>Release Toggle:</b> None			

## iOS ViewPoint

The iOS ViewPoint software runs on all Teladoc Health Windows devices and iPads.

**Browser Support:** Chrome, Safeari-MAC, Firefox, and Edge.

**Info Menu: The** iOS Viewpoint info menu has been updated for easier navigation, support, and log upload information.

Key	Component	Version	Operating System
IOS-1210	iOS ViewPoint	Taurus Dot one	iOS
<b>Release Toggle:</b> None			

**Onboarding Screens:** iOS Viewpoint onboarding screens allow end users to selective media and permissions during initial launch for an optimal virtual encounter.

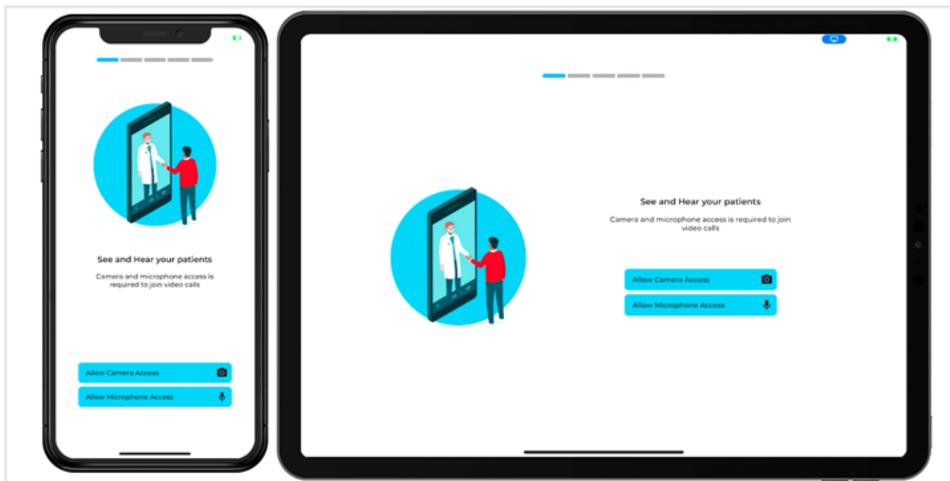

Key	Component	Version	Operating System
IOS-1110	iOS ViewPoint	Taurus Dot one	iOS
<b>Release Toggle:</b> None			

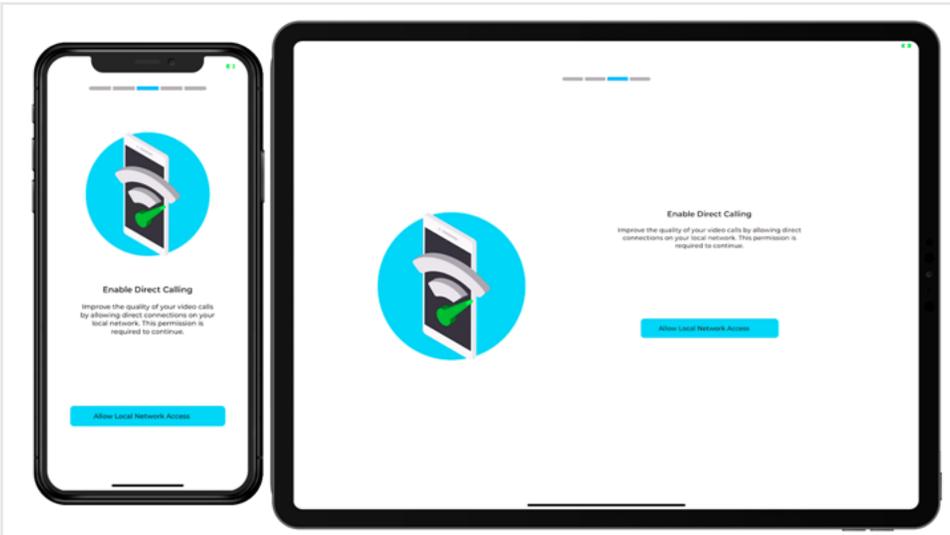

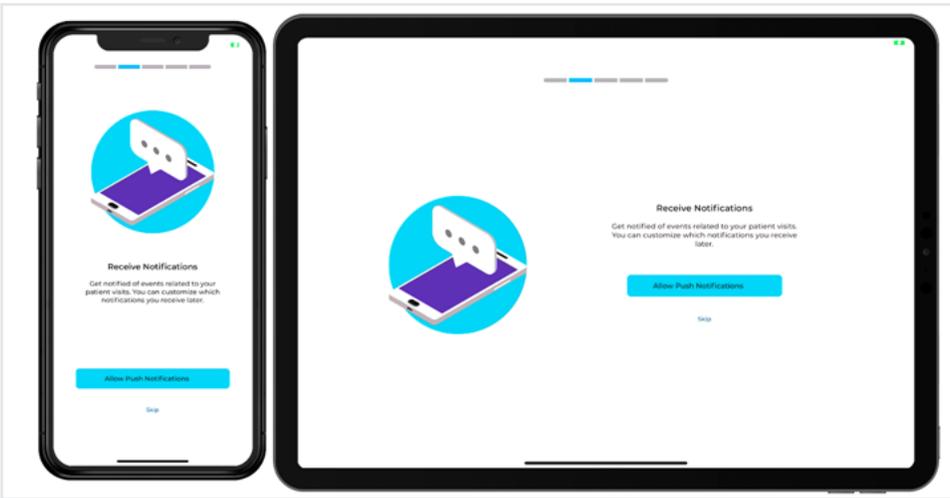

## iOS Provider Access Software

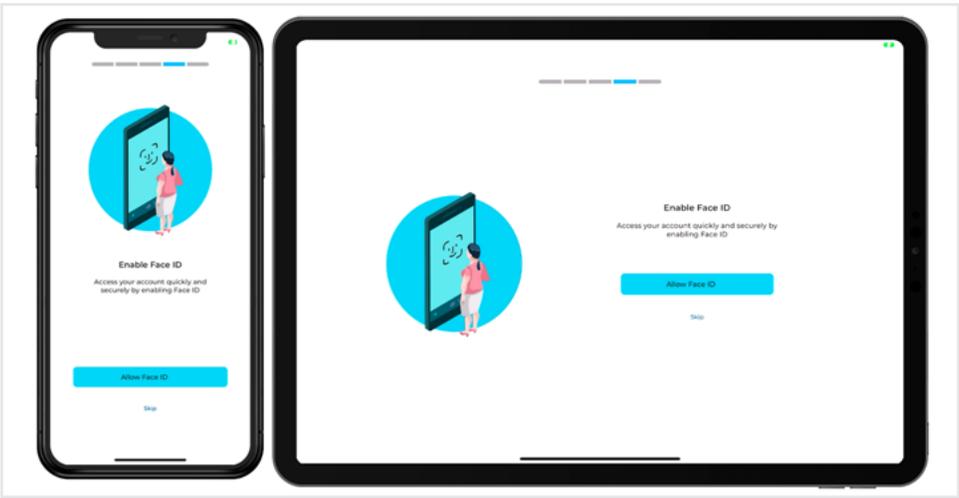

The iOS Provider Access software is used for scheduled and on-demand care.

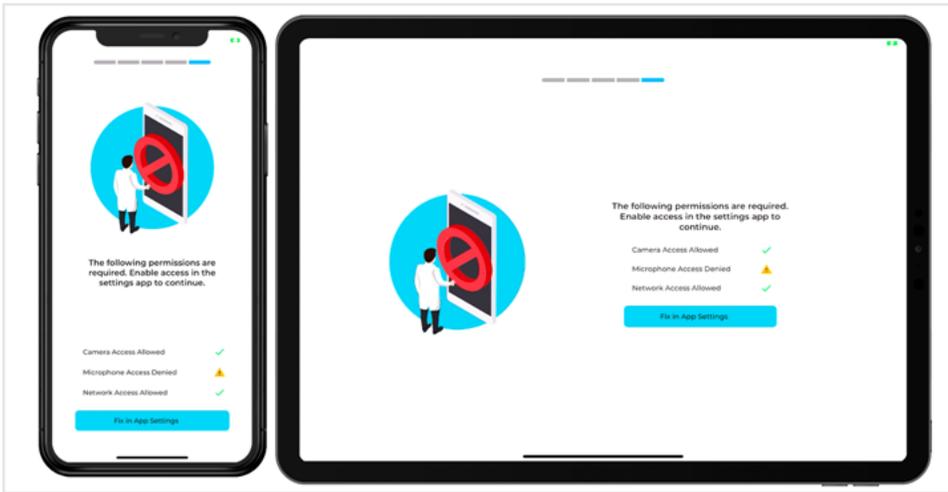

**Onboarding screens:** During an install, users can set permission screens that are required during a virtual encounter. These include camera and microphone, notification, local Network Access, and biometrics.

Key	Component	Version	Operating System
IOS-1109	iOS Provider Access App	Taurus Dot one	iOS
<b>Release Toggle:</b> None
