Release Notes for Quarter 2, 2022

The Teladoc Health Product Management team remains committed to providing continued improvements and enhancements for our solutions and services to support the growth of your telehealth programs. These release notes include the details of all release content delivered during our Q1 release.

The Teladoc Health Solo™ Platform releases do not align to a calendar quarter. The Q2 engineering development continued through the second week of April.

Below are highlights of recent and planned product releases and a brief highlight of new features and updates to the Solo™ Platform.

Q2 2022 Solo Platform Releases

Web App

Web Provider and Patient Apps: The Teladoc Health Web Provider and Patient App releases occur every two weeks. The primary focus for this quarter included:

- The highly requested feature that allows Providers to be assigned to an Appointment, provides all related notifications and updates to activity logs.
- New intelligence for identifying a duplicate Patient during Patient entry and ability to select which entry will be used as the source.

The last bi-weekly update will occur July 8, 2022 in client test environments and July 12 in production. All enhancements behind a release toggle are enabled in client test environments biweekly and will be enabled in all production environments Aug 16, 2022.

Mobile App

iOS Provider and Patient Apps: Teladoc Health iOS Provider and Patient Apps will be available in the App Store as of the **week of July 18, 2022** with the ability now to pin up

to two users in a call and new icons next to names to easily identify the Provider and/or Interpreter. The schedule for whitelabel Clients will follow the general release.

Smart Notes Module

The Teladoc Health Smart Notes Module releases occur every two weeks. The primary focus for this quarter was the ability for practitioners to return to the field they were last documenting after navigating away. The last bi-weekly update will occur July 8, 2022 in client test environments and July 12 in production. All enhancements behind a release toggle are enabled in client test environments biweekly and will be enabled in all production environments August 16, 2022.

Analytics Portal

Automated Delivery Service: Teladoc Health Automated Deliver Service now allows clients to receive a direct, daily feed of raw data via a secure FTP. This will be delivered to Clients the week of July 12, 2022.

Imaging

Imaging Portal: The Teladoc Health Imaging portal now supports rapid location search and selection and the ability to collapse the **Search** panel for improved image viewing. This was delivered to Clients as part of the Image 2.10.0 release in June 2022.

Connected Devices

Teladoc Health **Connected Devices** release of the Windows devices software, Windows Provider Access, iOS Provider Access and iOS Viewpoint rolled out to devices **Beginning June 22, 2022** and are now complete. Improvements include:

Windows Device Software (includes Win Viewpoint Software): The new release of the Windows Device software has moved to a full 64-bit installation.

Windows Provider Access Software: The new release of the Windows Provider Access software has transitioned to 64-bit support and now supports Windows 11 operating system.

iOS Provider Access Software: The new release of the iOS Provider Access software allows patients to view a host shared screen.

Browser Support

As part of our Quarterly release, Teladoc Health revises the list of supported browsers and versions. With this release, there are no planned Support changes.

Browser	Current Support	Support Starting April 10, 2022	Operating System
Chrome	91	91	Mac OS 10.14 and later Windows 7 and 10 Android v7.0 and later
Safari	14	14	Max OS 10.14 and later iOS 12.1 and later
Firefox	88	88	Windows 7 and 10
Edge	88	88	Windows 10

Solo™ Platform

Browser Support: IDA/Electron, Chrome, Safari-MAC, Firefox, and Edge.

Platform Administration

Admin Center: The concept of "Enterprise" was renamed to "Tenant".

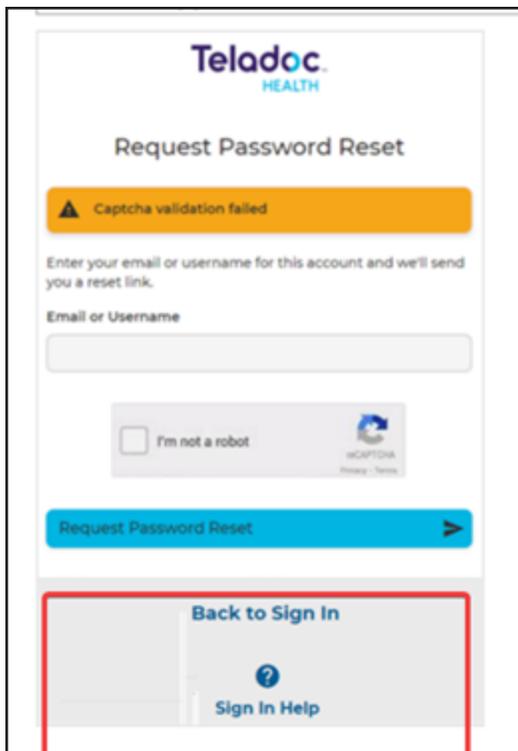

Key	Component	Browser(s)	Operating Systems
CORE-6701	Platform Administration	IDA/Electron Chrome Safari, Mac Firefox	Mac OS and Windows - 64bit
Release Toggle: None			

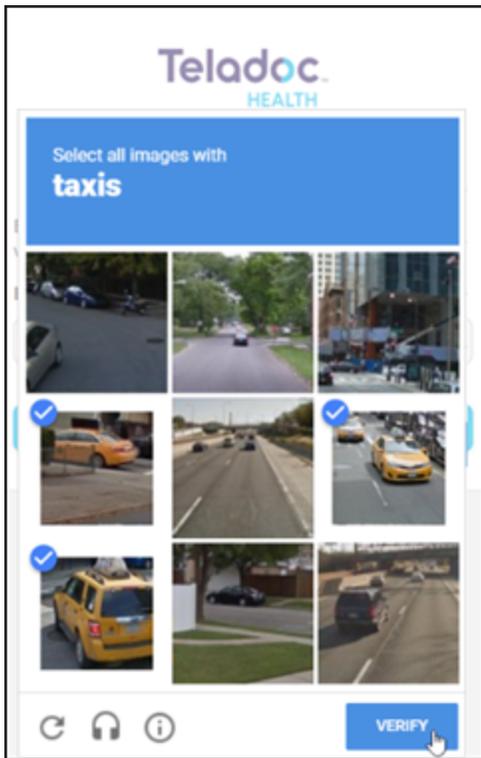

Platform Enhancements

Password Reset - Spam prevention: The Password Reset feature validates that a human is interacting with the page. There are two types of validations. The first one is transparent to users and if it passes, then there is no action required. If it fails, the second type of validation takes action where users have to validate that they are human by completing a challenge. The goal is to prevent spam and automated attempts.

Key	Component	Version	Operating System
CORE-6837	Platform Enhancement	2022.7.1	MacOS, and Windows - 32bit and 64bit.

Release Toggle: None

User Account Lockout: The number of login attempts that fail before an account gets locked has been reduced from 8 to 5. After a user unsuccessfully attempts to log in 5 to 8 consecutive times, the user’s account will be locked for 30 minutes.

Key	Component	Version	Operating System
CORE-5135	Platform Enhancement	2022.7.1	MacOS, and Windows - 32bit and 64bit.

RVN-1738	Platform Enhancement	2022.5.1	MacOS, and Windows - 32bit and 64bit.
Release Toggle: None			

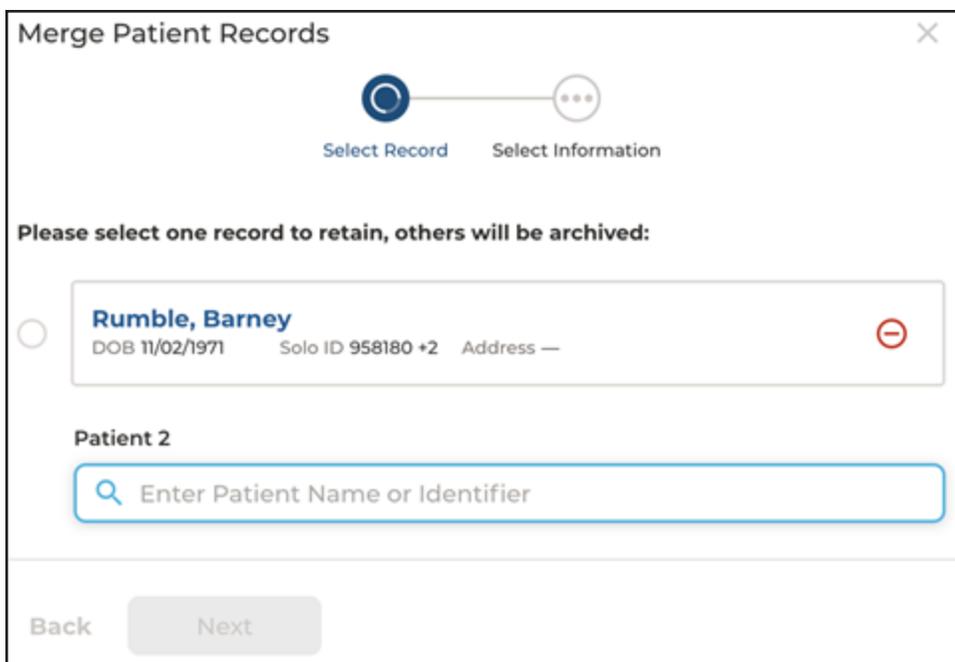

Patient Merge

Patient Merge: The Solo platform now provides merging of any duplicate patient profiles that were created accidentally for existing patient records; including the ability to carry over any existing document. This features is only available to users with Practitioner Admins and Back Office roles.

Patient Page: Users can start a patient merge by selecting a patient from the list in the **Patients** page and hovering over **Merge** from the right edge.

From the subsequent screen, users can search for one or more patient records to merge. Users can also select a single patient record that will be maintained as a 'surviving' patient record that will carry any documentation over from any archived patient record.

Users are presented with the option to pick and select information from different profiles to be retained and pooled together in the final 'surviving' patient profile. Once information is selected, users can merge the patient records. Duplicate records will no longer be displayed in the patient list and will be labeled and maintained as **Archived**. Searching for the archived patient records will display the latest profile results with an **Alias** badge.

Merge Patient Records

[Back](#) [Merge](#)

Scanning for Duplicates: Administrators can run a scan that will automatically search patients for potential duplicate records based on **Name**, **Identifiers** or **Address**. The initial scan will run in the background. Users are alerted when it is complete and the results are ready to be reviewed.

Once ready, duplicate results are conveniently categorized and presented by the group.

Users can select two or more patients from a group to merge the patients into a single record. Admin will again be presented with the option to select one profile to retain as a

surviving record and the ability to pick and choose information from the different records.

[Back](#) [Merge](#)

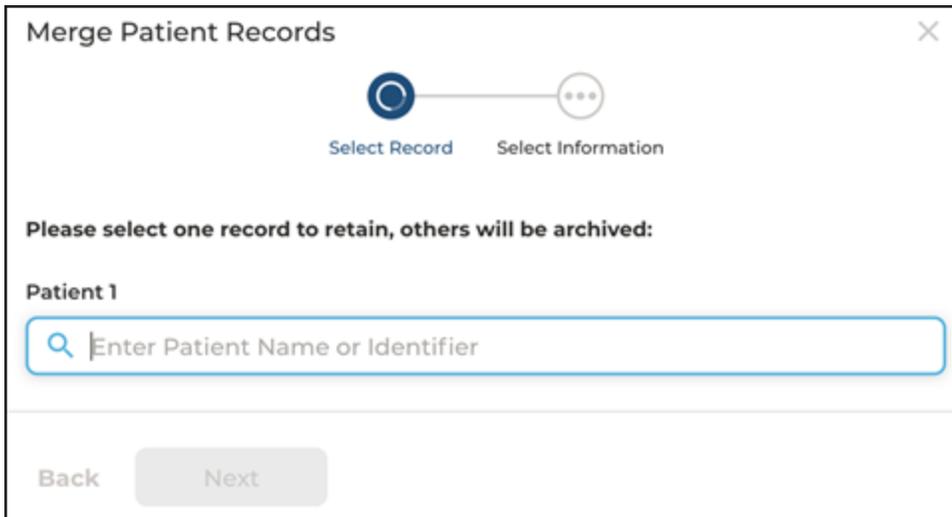

Once complete, users can review the final surviving record by selecting a patient.

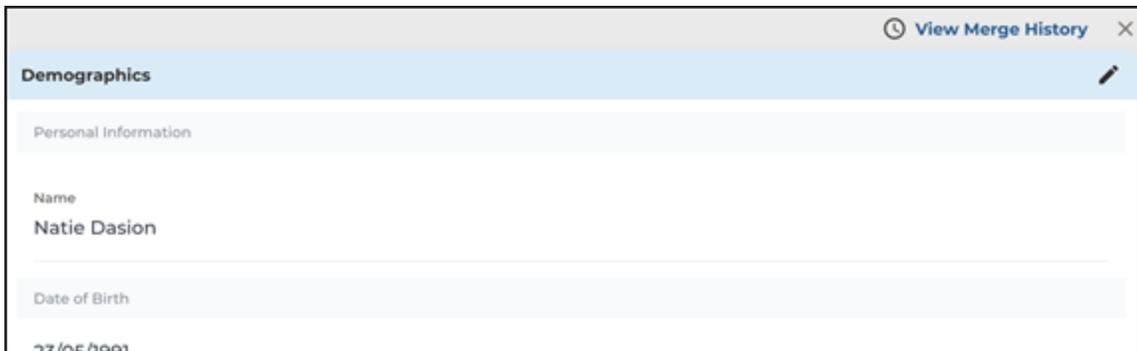

Merge History: Admins can view the merge history in the practice by selecting [View Merge History](#) from the top right corner.

Manual Merge: Users can merge two or more records manually by selecting the [Manual Merge](#) button from the top right corner. Users can search for S patient by name or identifier to add them to the list of records to be merged following the same steps as previous methods to complete the merge.

Surviving Patient Profile: Patient profiles that are a result of one or more merges include a **View Merge History** button that display the detail of merges.

Patient Unmerge: Users can revert merges using unmerge functionality by selecting a merge from the **Merge History** screen. Upon unmerge, any archived records are reverted back to their original state. Any documentation and updates to the patient are retained in the surviving patient record and are not carried over to the revived records.

Report Generator Encounters Field:

Encounter Details: Nine additional data fields have been added to the Report Generator.

Exclude virtual care (audio/video) sessions less than seconds

- Encounter details
 - Encounter Created at
 - Scheduled Time
 - Encounter Created by
 - Encounter Creator Username
 - Encounter Creator Role
 - Encounter Status
 - Practice
 - Service
 - Solo Visit ID
 - External Encounter ID
 - Solo Patient ID
 - Patient Group Name
 - Patient Group ID

The Encounter Status includes:

- Not Started
- In Progress
- Canceled
- Completed

Unsigned, signed, and amended status previously found under Encounter Status, can now be found in Note Status under template data.

Exclude virtual care (audio/video) sessions less than seconds

- Acute Neurology Consultation Note
 - Note name
 - Note status
 - When signed
 - Who signed
 - NPI
 - When Amended
 - Who Amended

- **Scheduled Time:** Data displayed in the report generator when a consumer schedules an appointment 2/9/2022 10:03:14
- **Encounter Created by:** How the encounter was created manually. Manual API, or HL7.
- **Encounter Creator Username:** Email for the user who created the encounter manually. This field will be null if the encounter was created by API or HL7. johnsmith@teladochealth.com.
- **Encounter Creator Role:** Solo role for the user who created the encounter manually. This field will be null if the encounter was created by API or HL7. Practitioner, Scheduler, Practitioner Admin, or Nurse.
- **Practice:** Name of the Practice set up in Super Admin. The Practice reports up to an Organization with Services. Western Health System and Santa Barbara Cottage Health System.
- **External Encounter ID:** Customer health system EMR generated encounter ID sent to Teladoc Health via an HL7 imessage. Varies depending on Electronic Medical Record.
- **Solo Patient ID:** Solo-generated patient identifier to coincide with health system EMR patient identifier like MRN. The **Visit ID** is overwritten in the UI if the MRN is added to the patient profile. 53926664.

- **Patient Group ID:** Solo system generated universal identifier for Patient Group ID's. 2b3cade6-a423-442b-a66b-992db102219c
- **Patient Group Name:** Name of a group of patients that join a session, like a diabetes coach, dietician, or another Solo user. The group name is used to identify the Reason/Use Case and participants, and is displayed in the **Queue**. Groups run for a set time and duration. Weight Management, ADHD Group, Nutrition Group, and Neuro Acute Group.

Provider App

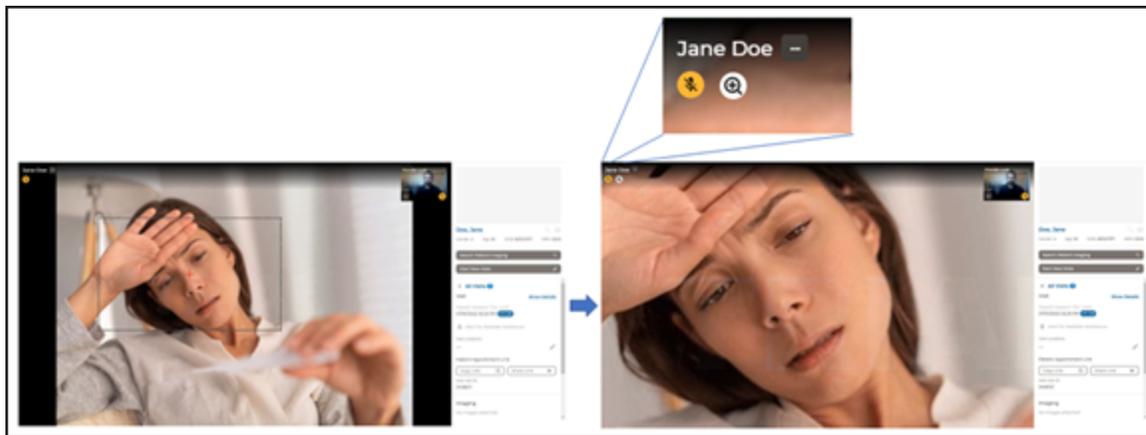

Web Provider App

The Web Provider App is a browser-based App used primarily for scheduled and on-demand low and medium acuity care.

Browser Support: Available on Chrome, Safari, and Firefox.

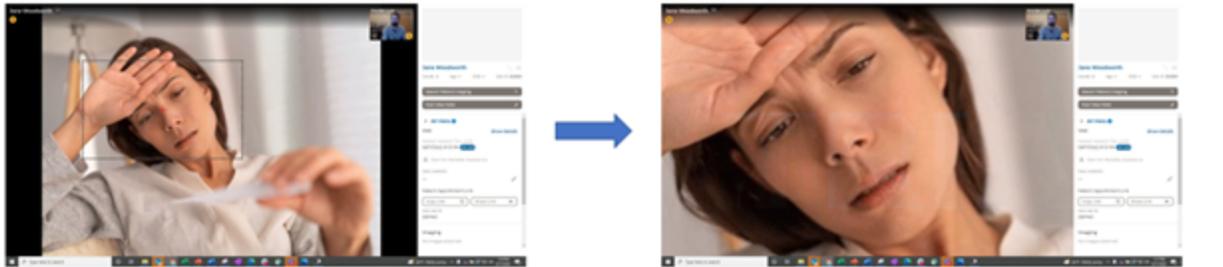

Zoom Notification and UnZoom function: A notification will be displayed for a user when they zoom in.

Key	Component	Version	Operating System
WPAS-1889	Web Provider App	2022.7.1	Windows - 32bit and 64bit
Release Toggle: None			

Video Zoom: Users have the ability to zoom in on an area of interest or to frame remote participants so they fill their screen by using the new digital box zoom feature. Use the mouse or the scroll wheel to zoom in for a better perspective of other users in a session. It also works when beaming into a Web Viewpoint. As a result, users ensure they are able to better see remote participants.

Key	Component	Version	Operating System
WPAS-1800	Web Provider App	2022.6.2	Windows - 32bit and 64bit
Release Toggle: None			

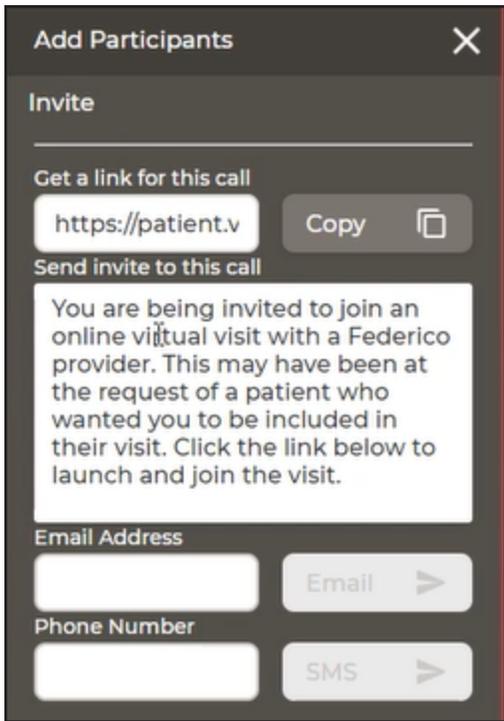

Digital Box-Zoom: There are two ways to zoom in on an area of interest:

1. Click in the center of the location you want to zoom in on and while holding your right mouse button down, drag the mouse so that a box is drawn over the area you want to see. Then let go of the mouse button.
2. Use your mouse wheel to zoom in and out.

To Zoom back out, press the left mouse button.

Invite Participant: Practitioners who connect directly to the Teladoc Health Web Viewpoint from **My Care Locations**, or directly with another practitioner, can invite participants to a session by email or SMS using the **Invite** panel

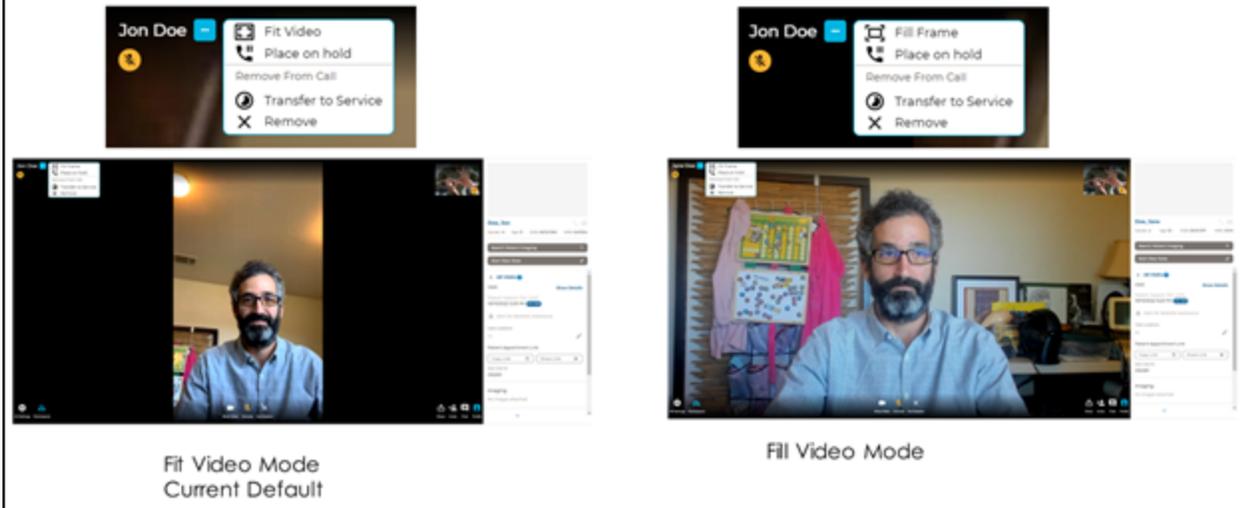

Key	Component	Version	Operating System
WPAS-1748	Web Provider App and Web Care Location App	2022.6.2	Windows - 32bit and 64bit
Release Toggle: None			

Video Display: All users can now change the amount of video they want to see from other participants in a session. From the context menu (...), users can choose to see a participant in Fill Video or Fit Frame mode. Fill video displays the participant's video in full screen without a letterbox; beneficial when the remote participant is using a smartphone. Fit video is the default mode. In this mode, all a participant's video is shown, which may result in letterboxing and a smaller view of the participant.

Desktop Provider App

Filter Queue: Users now have the ability to filter patients in Queue by the practitioner they have scheduled a session with.

Key	Component	Version	Operating System
BETA-1650	Desktop Provider App, Provider App, and Web Provider App	2021.11.1	MacOS, and Windows - 32bit and 64bit.
Release Toggle: AssignProviderToAppointment			

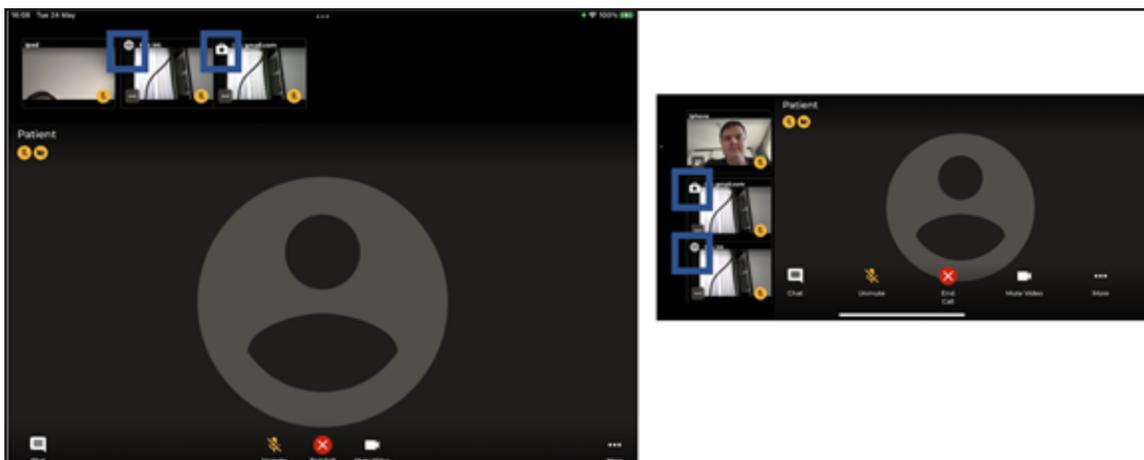

iOS Provider App

The iOS Provider App is used for scheduled and on-demand care.

Patient Identification: A Doctors Bag icon is displayed next to the practitioners name to help patients easily identify the practitioner. A 'Globe' icon is displayed next to an Interpreter's name helps patients easily identify an interpreters in a session.

Key	Component	Version	Operating System
IOS-1735	iOS Provider App, iOS Care Location App, and iOS Patient App	44.0	iOS

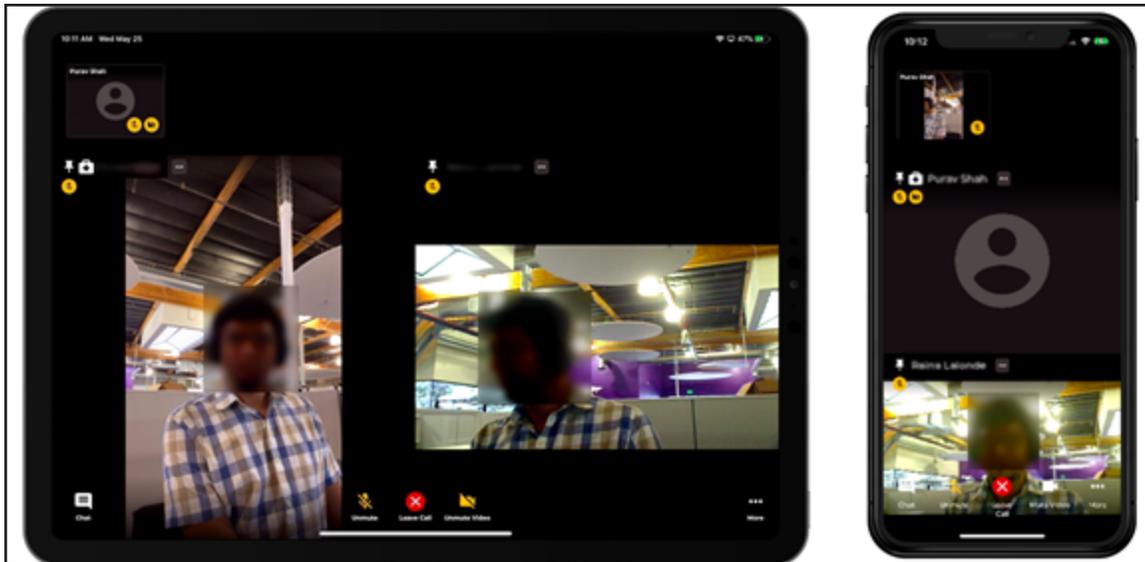

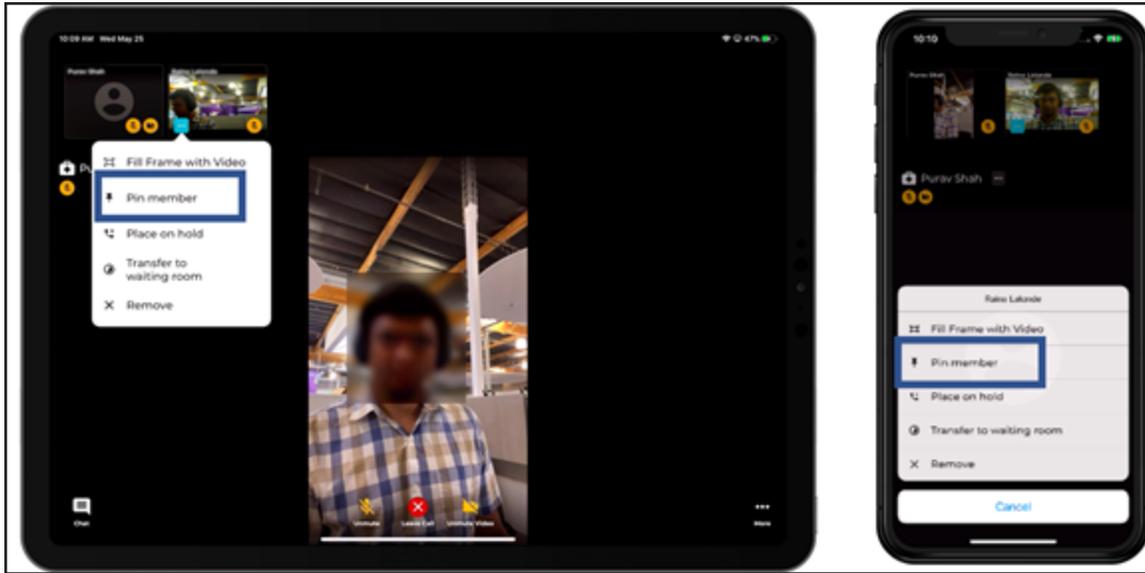

Release Toggle: None

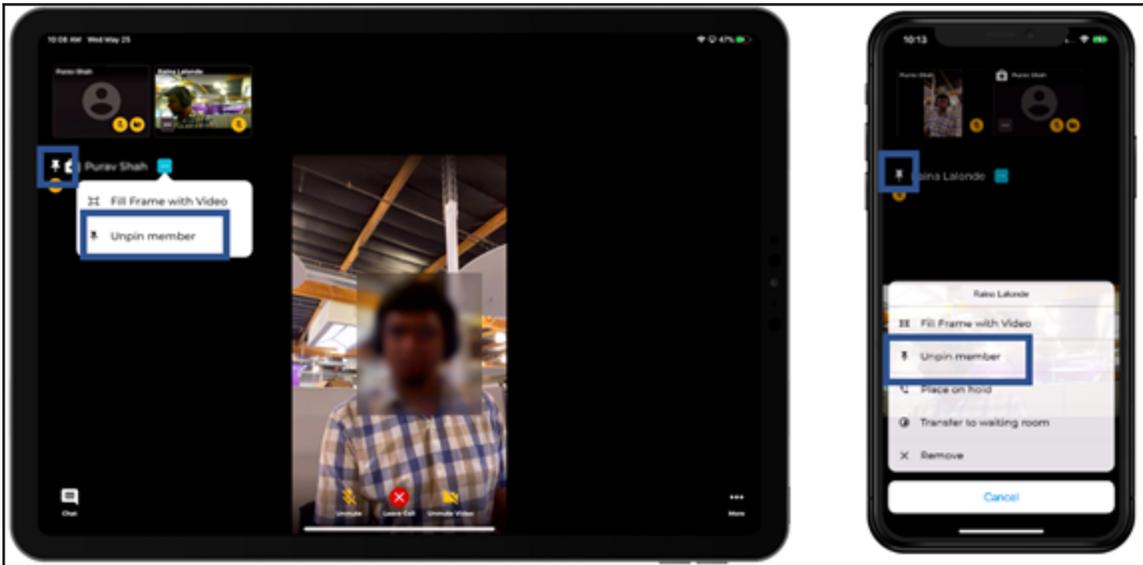

Mult-party Session: Ability to pin up to two individuals in a session; allowing you to see participants side by side. Users can unpin a user by clicking on the pin icon or by going to the context menu.

Key	Component	Version	Operating System
IOS-1686	iOS Provider App, iOS Care Location App, and iOS Patient App	44.0	iOS

Release Toggle: None

Patient Joins Session: In a group call when a patient joins a session, they will see their practitioner's video on the main view.

Key	Component	Version	Operating System
IOS-1241	iOS Provider App, iOS Care Location App, and iOS Patient App	44.0	iOS
Release Toggle: None			

Interstitial screen: The Interstitial screen has been updated for patients before they join a session. A new message has been added and a **Leave call** dialogue box for practitioners when Services (i.e. waiting room) is enabled for **Notify Patients When a Provider Joins the Call**.

Key	Component	Version	Operating System
IOS-462	iOS Provider App	44.0	iOS
Release Toggle: None			

Patient App

Web Patient App

The Web Patient App is used by patients to attend scheduled and on-demand low and medium acuity care appointments.

Practitioner Name: A **Doctors Bag** icon displays next to the practitioner's name to help patients identify who the practitioners are in a session.

Key	Component	Version	Operating System
WPAS-1630	Web Patient App	2022.5.2	Windows - 32bit and 64bit
Release Toggle: None			

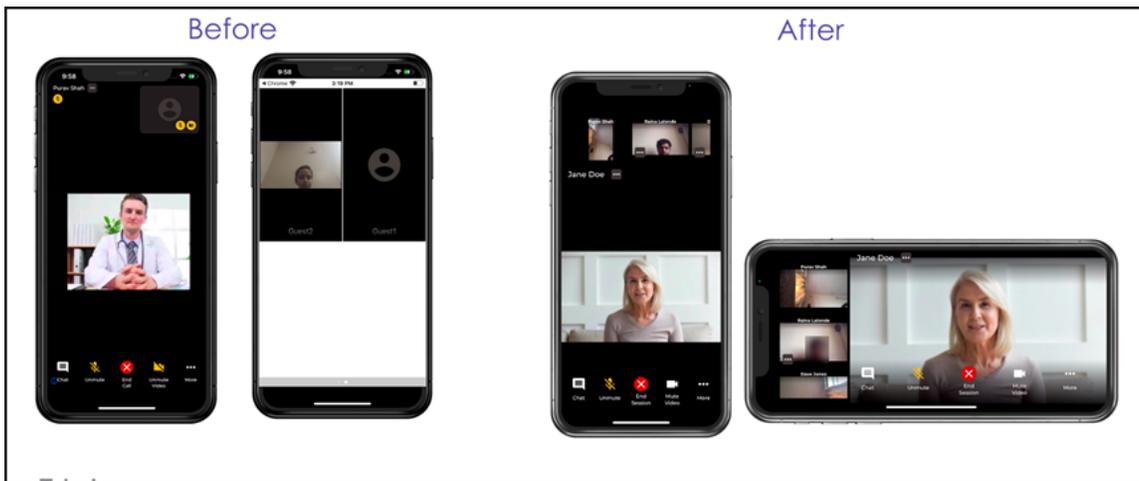

iOS Patient App

The iOS Patient App is used by patients to attend scheduled and on-demand low and medium acuity care appointments.

Videocall layout: A similar interface for patients who use their iPhone for sessions with the iOS Provider App, allows them to view all users by scrolling through the thumbnails at the top of the screen.

Key	Component	Version	Operating System
IOS-1768	iOS Patient App	44.0	iOS
Release Toggle: None			

Analytics

A new release of the Teladoc Health Analytics module will be pushed to all clients July 12, 2022 with further enhancements to our datasets.

Care Location Audit tab: In the Performance Report, the **Care Location Audit** tab has three field changes.

- Internal vs Outreach has been renamed to Internal or Outreach.
- Building Owner Parent Company has been renamed to Building Owner Ultimate Parent.
- Device Owner Parent Company has been renamed to Device Owner Ultimate Parent.

Key	Component	Version	Operating Systems
DT-4403	Analytics Portal	2022.7.12	Mac OS Windows 32 bit, Windows 64 bit, and Android iOS
Feature Toggle: None			

Workbook Date Ranges: All workbook date ranges have been updated to refelect the most recent quarter of 07-01-2022 to 06-30-2022

- Administrative Management
- Program Management
- Reliability
- Appointment Overview
- AV Quality Surveys

Key	Component	Version	Operating Systems
DT-4372	Analytics Portal	2022.7.12	Mac OS Windows 32 bit, Windows 64 bit, and Android iOS
Feature Toggle: None			

Program Management Dashboard: The Program Management Dashboard's box and whisker graph will display a single color point to provide a more accessible user interface

Key	Component	Version	Operating Systems
DT-4363	Analytics Portal	2022.7.12	Mac OS Windows 32 bit, Windows 64 bit, and Android iOS
Feature Toggle: None			

The new Direct Videocalls dataset provides clients a way to see session that occurred "on-demand" or those that were scheduled without a prior appointment in place. Data fields include:

- Practice
- Care Location
- Practitioner
- Videocall Start Time
- Videocall Stop Time
- Videocall Type

Key	Component	Version	Operating Systems
DT-4317	Analytics Portal	2022.7.12	Mac OS Windows 32 bit, Windows 64 bit, and Android iOS
Feature Toggle: None			

A/V Quality Survey dashboard: The [A/V Quality Survey](#) dashboard now includes a time slider so clients can choose a specified time frame.

Key	Component	Version	Operating Systems
DT-4235	Analytics Portal	2022.7.12	Mac OS Windows 32 bit, Windows 64 bit, and Android iOS
Feature Toggle: None			

The Automated Delivery Service allows clients to receive a direct, daily feed of raw data via secure file transfer protocol (sFTP).

Features include:

- The Automated Delivery Service can provide both operational and clinical data securely.
- The Automated Delivery Service will deliver the datasets as a CSV file.
- The Automated Delivery Service CSV files will be overwritten whenever the process is run.
- The Automated Delivery Service data sets will display a date and timestamp after each file so customers can validate they picked up the most recent data (e.g. Jan 13, 2021 7:00 AM)
- The Automated Delivery Service's data sets will contain a rolling 30 days of data.

- The Automated Delivery Service has the flexibility to send files with any character delimiter to separate fields to reduce any additional conversion efforts.
- The Automated Delivery Service should produce one additional row at the end of the file. The carriage return, line feed (CRLF) should end with just 1 CRFL as a standard

Data Sets Available:

- Sessions Data – Device/PAS related data
- Appointments Data– IWA/Solo related data
- Provider Survey Data – IWA/Solo custom provider surveys that appear after the videocall
- Customer Survey Data – IWA/Solo custom customer surveys that appear after the videocall
- Report Generator – IWA/Solo clinical template data

Key	Component	Version	Operating Systems
DT-3846	Analytics Portal	2022.7.12	Mac OS Windows 32 bit, Windows 64 bit, and Android iOS
Feature Toggle: None			

Appointment Dataset: The Appointments data set will no longer show the column value of the field [Patient Online Check-in Status]. It is no longer used. Next to each UTC time field, is the local timestamp based on the practice time zone. The time no longer needs to be converted.

Local Time Fields:

- Appointment Created Time
- Appointment Time
- Appointment Start Time
- Appointment End Time
- Patient Last Response Time
- Wait Start Time
- Wait End Time
- Videocall Start Time
- Videocall End Time

Key	Component	Version	Operating Systems
DT-3830	Analytics Portal	2022.7.12	Mac OS Windows 32 bit, Windows 64 bit, and Android iOS
Feature Toggle: None			

The Appointment Overview Dashboard includes a new bar chart that aggregates the number of appointments conducted over time. The bar chart is used to provide a simple and easy way to represent time series data and can be displayed as daily, monthly, quarterly, and yearly. Additionally, the box and whisker graphs now display a single color point to provide a more accessible user interface

Key	Component	Version	Operating Systems
DT-2295	Analytics Portal	2022.7.12	Mac OS Windows 32 bit, Windows 64 bit, and Android iOS
Feature Toggle: None			

Imaging

Immediately access diagnostic-quality studies - Imaging is a single portal to quickly access DICOM imaging at any of the sites running third-part imaging modules.

Number of Images: Users searching for imaging studies on the Imaging Portal see the number of images within a study before opening it on the Viewer. This allows them to anticipate if a study might take a long time to load on the viewer because of the number of images it contains.

Key	Component	Browser(s)	Platform
IMG-462	Imaging	IDA/ Electron Chrome Safari, Mac, and Firefox	MacOS, Windows - 32 & 64bit
Release Toggle: None			

The screenshot shows the Teladoc Imaging interface. At the top, there is a header with the Teladoc logo and 'Teladoc Imaging' text. Below the header is a search bar with a 'Filter' button. The main content area displays a table of imaging studies for a patient named BROWN, JOSH. The table has columns for Patient Name, Patient DOB, Patient ID/MRN, Study Date, and Study Modalities. The first study is expanded, showing the 'Number of Images 423' field highlighted with a red box. The second study shows 'Number of Images 59' and the third shows 'Number of Images 4'. A 'Live Chat with Support' button is visible in the bottom right corner.

Patient Name	Patient DOB	Patient ID/MRN	Study Date	Study Modalities
✓ BROWN, JOSH	1964-09-03	anon-07835530	2022-06-09 06:24:03	CT

Hamilton Depression Rating Scale (HAM-D)

The HAM-D is a multiple item questionnaire used to provide an indication of depression, and as a guide to evaluate recovery. The questionnaire is designed for adults and is used to rate the severity of their depression by probing mood, feelings of guilt, suicide ideation, insomnia, agitation or retardation, anxiety, weight loss, and somatic symptoms.

Hamilton Depression Rating Scale (HAM-D) Score

1. **DEPRESSED MOOD (sadness, hopeless, helpless, worthless): 1** Sadness
2. **FEELINGS OF GUILT: 0** Not present
3. **SUICIDE: 0** Not present
4. **INSOMNIA: EARLY IN THE NIGHT: 0** Not present
5. **INSOMNIA: MIDDLE OF THE NIGHT: 0** Not present
6. **WORK AND ACTIVITIES: 0** No difficulties
7. **RETARDATION (slowness of thought and speech, impaired ability to concentrate, decreased motor activity): 0** Not present
8. **AGITATION: 0** Not present
9. **ANXIETY PSYCHIC: 1** Tension and irritability
10. **ANXIETY SOMATIC: 1** Mild
11. **SOMATIC SYMPTOMS GASTRO-INTESTINAL: 0** Not present
12. **GENERAL SOMATIC SYMPTOMS: 1** Slight
13. **GENITAL SYMPTOMS (symptoms such as loss of libido, menstrual disturbances): 1** Slight
14. **HYPOCHONDRIASIS: 0** Not present
15. **LOSS OF WEIGHT: 0** No weight loss
16. **INSIGHT: 0** No loss

Score: 5 Normal
