

Teladoc Health™
Bi-Monthly Release Notes

Release Notes for February 14, 2023

The following is a list of features included in this software release. Clients can request a feature be enabled in their production organization by contracting our Technical Assistance Center.

General Application Improvements

This release includes various bug, performance, maintenance fixes that improve the stability and performance of the application. We have addressed several issues reported by our users. This release also includes several performance and technology updates to ensure that our software remains compatible with the latest operating systems and hardware.

Provider App

Web Provider App

The Web Provider App is a browser-based App used primarily for scheduled and on-demand low and medium acuity care.

Browser Support: Available on Edge, Chrome, Safari, and Firefox.

Reload the Application: Adding ability to reload the application in case of failure during the initialization.

Key	Component	Version	Operating System
