Release Notes for June 22, 2023

The following is a list of features included in this software release. Clients can request a feature be enabled in their production organization by contracting our Technical Assistance Center.

General Application Improvements

This release includes various bug, performance, maintenance fixes that improve the stability and performance of the application. We have addressed several issues reported by our users. This release also includes several performance and technology updates to ensure that our software remains compatible with the latest operating systems and hardware.

Release Notes

Browser Support: IDA/Electron, Chrome, Safari-MAC, Firefox, and Edge.

Provider App

User experience enhancement:

Teladoc Admin team can now enable wet signatures, allowing providers to apply free-form drawn signatures directly on clinical notes. This feature ensures compliance with specific regional requirements. To enable wet signatures on clinical documentation, please reach out to your customer support representative for assistance. Teladoc remains dedicated to providing comprehensive solutions that meet user needs and regulatory compliance.

Key	Component	Version	Operating System
HHSINT-431	Provider App	2023.2.3	Mac, Windows, iOS, Android
Release Feature Toggle: No			

User experience enhancement:

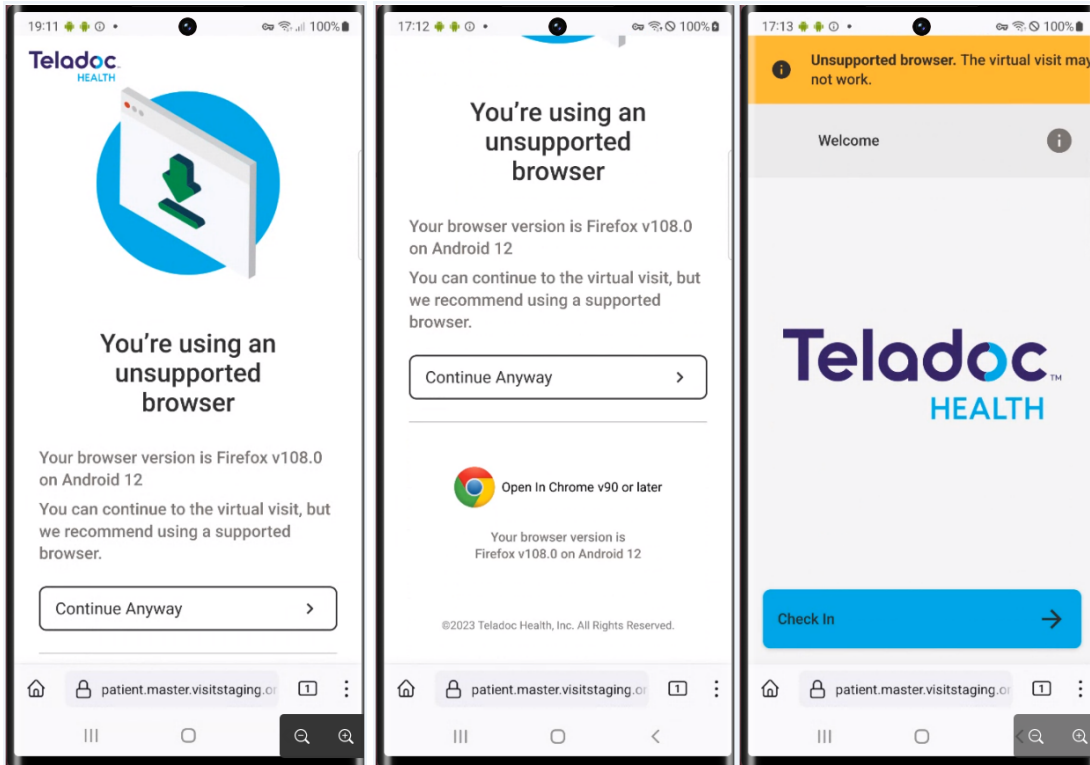

We have resolved an issue where certain Provider and Patient email notifications lacked the rescheduled from and rescheduled to times. Our notification system has been updated to include these crucial details in all relevant rescheduling notifications, ensuring accurate scheduling information for Providers and Patients. This enhancement improves efficiency and facilitates effective coordination in scheduling adjustments.

Key	Component	Version	Operating System
